

INSTALLATION GUIDE

Thank you for purchasing your artificial green walls from Green Envee.

We will now take you through a step by step guide to ensure your Green-wall fits effortlessly. Should you have any questions at any stage **call us on 0203 893 1110.**

Please make sure you have carefully measured up to make sure you have the correct amount of panels to cover the area.

Enclosed you will find a bag of basic hook fixings that we recommend for a low level installation. Should you be installing any of our panels at a height exceeding 250cm recommend you seek professional advice as to the most suitable fixings to use.

SUPERIOR ARTIFICIAL PLANTING SOLUTIONS

Our plants are secured to a metal mesh panel backing which measures 85cm by 85cm with 5.5cm grid squares within the panel, the panels weigh between 6 & 7 kg. Each panel come with a pack of 5 hook fixings which are suitable for brick and concrete structures. We strongly recommend you use nylon cable ties as an added safety feature to secure the panel to fixings.

For alternative installations please see recommendations below.

Plasterboard & Timber – You will need to purchase specialist plasterboard plugs and screw in cup hooks or similar.

Wire Fences – Use heavy duty clear, black or green cable ties to secure the panels.

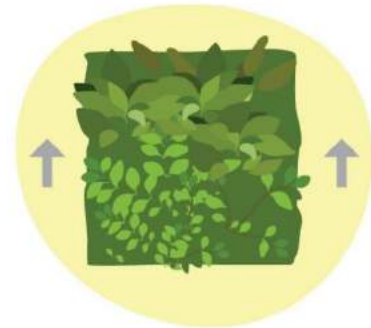

SUPERIOR ARTIFICIAL PLANTING SOLUTIONS

To make the installation quick & easy, we've put together a simple step-by-step guide to help you out.

1. Make sure the plants on the panels are facing upward as that's the direction the panels need to be installed. Once the panels are in place you'll need to tease the plants out to give that natural look. Don't worry if you lose some foliage along the way that's natural.

2 When you begin, be sure to start from the top left or right corner and work your way across.

3 Use a spirit level or a chalk line to mark out the line of the panels. We suggest you install the first hook on the second row, one full square in and one full square down from the top left, top right, bottom left, bottom right and centre as shown below. The red circles are the suggested hanging positions.

4 Once the hooks are in place offer up the panel, adjusting the angle of the hook as needed to ensure the panel sits level and square. Subject to your location you could choose to secure a cable tie around the hook and frame for extra stability and security but this is not essential.

5 Put your next panel in place once you have repeated the hook installation.

SUPERIOR ART

6 Make sure the panels are close together ensuring the overhanging plants are not tangled up within the backing. You can choose to use cable ties to join them close together if desired. Available at your local DIY store.

7 Repeat this process until the top row is complete.

8 Once the first row is in place/fixed to the wall on the top and bottom, move on to the second row. Simply work along each row until the panels are all joined together, remember to open the plants up as you go along to finish.

9 Should you need to cut any of the panels down, turn the panels to show the rear, carefully mark the mesh and cut accordingly, remembering which side you need. To cut we suggest using a angle grinder with a metal blade, remembering to wear safety glasses & ear protection, ensure you don't cut through the plants. If you need to remove plants off the panels, standard pliers will allow you to remove the metal or cable ties depending on the panels used.

10 If you have any spare foliage you can use a cable tie to secure them into the fixed panels to fill any possible gaps. Should your require any extra foliage do let us know.

SUPERIOR ARTIFICIAL PLANTING SOLUTIONS

To help with your installation all our panels come with the hooks pictured below, suitable for brick and masonry.

MAINTENANCE REQUIREMENTS

A simple hose down for external wall panels and a feather duster/long pole duster for internal panels.

Now all you have to do is sit back and enjoy looking at your Green-wall from Green Envee.

At Green Envee we pride ourselves on providing the best quality products and customer service.

If you have any questions, problems or need some advise please do not hesitate to contact us and we will be happy to help.
